IN PROGRESS

Dell Technical Assessment: Quick Wins

Short-term operational optimizations requiring minimal cost but delivering high impact.

Data Protection

EST. 2-6 MOS

VM Backup Cross-Replication
Migrate policies to target DR Data Domain systems. Driven by DPS Residents.

Stabilize Computer Crimes Backups
Finish Gen5A config. Work forward/backward on DD1 & DD2.

Simplify SQL Backups (PPDM)
Agent install, policy config, and performance validation with DBA team.

PowerMax & Network

EST. 1-2 MOS

Fiber Channel Ports Increase
Add FC OM3/OM4 connections to separate Production and Backup traffic.

VMAX to PowerMax Migration
Free up VMAX. Expand MDC and PSAC II drives. Pending NYPD approval.

CloudIQ Cyber Security
Knowledge transfer to implement analysis, reporting, and mitigation.

DAS DCNM Update
Configure centralized NDFC instance for managing DAS SAN fabrics.

PowerScale (UDS)

EST. 2 MOS

Upgrade Core Clusters (OneFS 9.10)
Failover users, upgrade clusters with no impact, failback. Needs maintenance window.

Superna Ransomware Implementation
Auditing and ransomware defense for Core PowerScale clusters. Superna providing temp licenses.
